

Investment Policy Statement (IPS)

Client Profile: Growth-oriented Individual Portfolio **Date:** August 2026

1. Executive Summary and Objectives

The primary objective of this portfolio is long-term capital appreciation. The investor has a high risk tolerance and a time horizon exceeding 10 years.

2. Strategic Asset Allocation and Constraints

The asset allocation must adhere to the following qualitative guidelines:

- Limit total technology sector exposure to a maximum of 40% of the total portfolio value.
- Limit allocation to a single stock holding to a maximum of 15% to manage idiosyncratic risk.
- Maintain a minimum cash or cash equivalent allocation of 10% for liquidity.
- Avoid any investments in tobacco companies or high-leverage derivatives.

3. Rebalancing Guidelines

The portfolio manager must check allocations quarterly and trim holdings (e.g. Apple or Microsoft) if their strategic weights exceed the threshold

limits by more than 5%.
